

configured to open when the pressure of said liquid reaches a predetermined level thereby allowing said heated liquid to escape said first inner bag as vapor; and

C1 a second inner bag accommodated in said outer bag and containing therein a substance to be mixed with said liquid, said second inner bag being made liquid permeable at least partially for allowing said heated liquid, after escaping said first inner bag, to enter said second inner bag and to heat and be mixed with said substance;

said outer bag having a vapor-releasing hole that is formed at the top of said outer bag and closed by a second seal configured to open when a pressure inside said outer bag reaches a predetermined value, and a liquid-releasing hole formed at the bottom of said outer bag for selectively discharging said heated and mixed liquid. 78.55-9

Sub D3 20. (Amended) A container, comprising:

an outer bag;

C2 a first inner bag accommodated in said outer bag and filled with a liquid, said first inner bag being made liquid-impermeable except at least for a liquid-releasing hole that is positioned in an upper part thereof and closed by a first seal configured to open when a pressure inside said first inner bag reaches a predetermined level by heating said liquid, thereby allowing said heated liquid to escape said first inner bag as vapor; and

a second closed inner bag accommodated in said outer bag and containing therein a substance to be mixed with said liquid, said second inner bag being made liquid permeable at least partially for allowing said liquid, after escaping said first inner bag, to enter said second inner bag and to heat and be mixed with said substance.

Please add new claims as follows:

Sub E1 26. The container of claim 10, wherein said outer bag has a generally spherical shape to sustain the high pressure inside said outer bag. C3

Serial No. 09/519,999

*Sub. C1* → 27. The container of claim 10, further comprising a plurality of said second inner bags disposed around said first inner bag.

*C3* 28. The container of claim 20, wherein said outer bag has a generally spherical shape to sustain the high pressure inside said outer bag.

29. The container of claim 20, further comprising a plurality of said second closed inner bags disposed around said first inner bag.
